**FIRE EXTINGUISHERS - Cosmic Multi-Purpose Dry Chemical - Portable Handheld**

ABC dry chemical is a multipurpose extinguishing agent that is suitable for use in offices, classrooms, churches, parking garages and retail. Not recommended for use on sensitive electronic equipment.

---

**SPECIFICATIONS:**

These units contain specially fluidized and siliconized mono ammonium phosphate powder, which smothers and breaks the chain reaction on Class B fires, fuses and insulates Class A fires and is a non-conductor of electricity. Non-toxic.

Conforms to Test Standards: CAN/ULC-S504 — ANSI/UL299 & CAN/ULC S508 — ANSI/UL711

**Operation:** Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation.

**Temperature Range:** -65° F (-53° C) to 120° F (49° C)

**Construction:** Heavy-duty steel cylinder with siphon tube, replaceable molded valve stem seal, visual pressure gauge, pull pin and upright squeeze grip. Corrosion and impact-resistant powder coat finish.

**Valve Material:** Aluminum

*Indicates mounting bracket standard. J hook wall bracket standard with all other extinguisher - mounting bracket available for those models at extra charge.

**Note:** NFPA regulations also require extinguishers to be inspected when initially placed in service and all local fire code and tagging requirements must be adhered to. All fire extinguisher sizes are nominal. Contact Customer Service for more information about ordering tagged extinguishers in your area.
SPECIFICATIONS:
These models contain a siliconized sodium bicarbonate base, the traditional dry chemical. Cleanup after use is generally easy, because the chemical does not normally bake to a hot metal surface. Non-toxic.

Conforms to Test Standards: CAN/ULC-S504—ANSI/UL299 & CAN/ULC-S508-ANSI/UL711
Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation.
Temperature Range: -65° F (-53° C) to 120° F (49° C)
Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable valve stem seal, visual pressure gauge pull pin and upright squeeze grip.
Valve Material: Aluminum

FIRE EXTINGUISHERS - Grenadier Pressurized Water - Portable Handheld

The Water extinguisher uses ordinary water as it's extinguishing agent, and can be pressurized with regular air, making recharging the extinguisher simple and economical.

All units meet the current requirements established by the National Fire Protection Association (NFPA) for NFPA10 "Standard for Portable Fire Extinguishers", and any other applicable NFPA standards. Tested and listed by UL to meet construction and performance standards for this type of extinguisher, and can be used where required by local codes such as OSHA.

FIRE EXTINGUISHERS - Nebula Water Mist - Portable Handheld

All water mist extinguishers are of non-magnetic construction, and are third party tested to be safe to use in proximity to MRI equipment. They are ideal for extinguishing live electrical fires because the mist is non-conductive, and does not leave a chemical residue.

SPECIFICATIONS:
The water mist extinguisher is ideal for Class A fires where a potential Class C (electrical) hazard exists. Units shipped empty.

Conforms to Test Standards: CAN/ULC-S554-ANSI/UL8 & CAN/ULC-S508-ANSI/UL71

Operation: The unique misting nozzle provides safety from electrical shock, making this extinguisher ideal for use in telecommunications and cleanroom environments.

Temperature Range: 40° F (4° C) to 120° F (49° C)

Construction: Non-magnetic stainless steel cylinder and misting nozzle. For use in medical facilities.

-The Nebula Extinguishers are shipped empty.
FIRE EXTINGUISHERS - Sentinel Carbon Dioxide - Portable Handheld

Carbon dioxide is a trusted non-conductive clean agent that is more effective for dealing with electronic equipment fires. Typically used in offices, classrooms, retail and research facilities.

SPECIFICATIONS:
This extinguisher contains liquid carbon dioxide under pressure.

Conforms to Test Standards: CAN/ULC-S503, ANSI/UL154 & CAN/ULC-S508-ANSI/UL711

Operation: Squeeze the lever, which opens the valve, allowing the carbon dioxide to be forced out. The discharge, which changes into a gas and appears as a smothering cloud of white snow, is then directed to the fire through a funnel-shaped horn. Electrically non-conductive.

Temperature Range: -22° F (-30° C) to 120° F (49° C)

Construction: Lightweight, high-pressure, aluminum cylinder with O-ring seal and straight thread brass valve. The Sentinel is absolutely rust-free and up to 30% lighter than CO2 units with steel cylinders.

FIRE EXTINGUISHERS - Mercury Halotron® - Portable Handheld

The Halotron® clean agent is an excellent replacement for Halon 1211 extinguishers. Because the extinguishing agent leaves no residue, it is ideal for protecting sensitive electronic equipment, laboratories, museums and vehicle maintenance facilities.

SPECIFICATIONS:
This model contains the clean extinguishing agent Halotron®, which is EPA-approved, government accepted and specified. This agent discharges as a liquid, then quickly evaporates, leaving no residue to clean up afterwards. U.S. FAA-approved for use in airports. NFPA-10 rating. Electrically non-conductive.

Conforms to Test Standards: CAN/ULC-S556-ANSI/UL2129 & CAN/ULC-S508-ANSI/UL711

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out.

Temperature Range: -40° F (-40° C) to 120° F (49° C)

Construction: Drawn steel cylinder with steel siphon tubes, power cone discharge stream, upright squeeze grip visual pressure gauge and corrosion-resistant paint finish.

Valve Material: Aluminum

CLASS B FIRES
Flammable Liquids and Gases

CLASS C FIRES
Energized Electrical Equipment

The Halotron® I clean agent is an excellent replacement for Halon 1211 extinguishers. Because the extinguishing agent leaves no residue, it is ideal for protecting sensitive electronic equipment, laboratories, museums and vehicle maintenance facilities.
**FIRE EXTINGUISHERS - Saturn Class K Wet Chemical - Portable Handheld**

Class K extinguishers are extremely effective in suppressing high temperature fires involving cooking oils and grease. The unique cooling properties deliver exceptional heat absorption ensuring the fire remains out.

---

**SPECIFICATIONS:**

These units are ideal for commercial restaurant applications as a portable supplement to pre-engineered suppression systems. A low “pH” potassium acetate solution is discharged in a fine mist that provides excellent range while preventing splashing and creating an effective saponification foam-type blanket necessary for suppressing liquid cooking media fires.

**Conforms to Test Standards:** CAN/ULC-S554-ANSI/UL8 & CAN/ULC-S508-ANSI/UL71

**Operation:** Squeeze the lever, which opens the valve, allowing the chemical to be forced out.

**Temperature Range:** 40° F (4° C) to 120° F (49° C)

**Construction:** Stainless steel cylinder with protective nozzle tip orifice seal and non-metallic nozzle tip finger guard. Industry standard horn and nozzle design. Name plate shows only the class “K” symbol.

---

All units meet the current requirements established by the National Fire Protection Association (NFPA) for NFPA10 "Standard for Portable Fire Extinguishers", and any other applicable NFPA standards. Tested and listed by UL to meet construction and performance standards for this type of extinguisher, and can by used where required by local codes such as OSHA.
