KB327 Koala® BoosterChair

The new Koala BoosterChair has a smooth contoured shape and rounded seat. The back rest and arm rests offer increased child comfort and safety. A strap on the back of the BoosterChair is designed to be attached to an adult dining chair.

The BoosterChair dimensions are comparable to other competitive brands on the market.

The BoosterChair is designed to accommodate children of 3 years up. Restraining devices are not required by ASTM (American Society for Testing and Materials) for booster chairs designed for children 3 years or older.

- Constructed of polypropylene, allowing the product to be both flexible and tough.
- Textured surface hides scuffs, yet easy to clean.
- Contains Microban® antimicrobial protection, which inhibits the growth of odor causing bacteria.
- Straps are easily removable for washing. Designed with a tight weave material for quick and effective wipe-down after use.
- Booster feet are slip scratch resistant.
- The open design allows easy stacking, minimizing in-store foot-print.
- Fully compliant with ASTM.
- No crevices or seams to trap food and dirt.
