These mirrors are used to increase safety standards in a factory, School, Hospital etc. Traffic mirrors are manufactured from either acrylic or polycarbonate for strength, durability and clear images. Traffic mirrors have reflectors around the rim of the mirrors, which add additional safety feature in dark.

Ideal for indoor or outdoor usage.

Vision's stainless steel convex mirror, providing the best viewing effect, is engineered to withstand extreme outdoor weather condition. It is the ideal solution for areas with high risk of vandalism, pilferage, or aggressive industrial chemical atmosphere due to its outstanding weather and impact resistance.

Stainless steel convex mirror can be easily installed at road intersection and parking lot where there is a severe risk of accidental breakage. Stainless steel mirror is virtually unbreakable and requires minimal maintenance, therefore, it produces cost effective result in the long run when compared to other materials that may require regular maintenance or replacement. It has indeed rapidly replacing mirror of other materials for both indoor and outdoor application for the above reasons

This Product is made from superior finishing stainless steel, precisely polished to perfection for a 'mirror finishing' look.

Vision Stainless steel Convex Mirrors are specifically engineered to be used as a safety, security and surveillance device for both indoor and outdoor areas where there is a high risk of accidental collisions, pilferage, shoplifting, etc. Strategically located Convex Mirrors can eliminate blind spots, thus creating a wider field of vision. Safety mirrors can be easily installed at hilly/winding roads, intersections, car park entrances and exits, corners, staircases, factories, stores and shops, schools, hospitals and many more locations.
