Operation & Maintenance

Deposit of specified coin allows operation of dispenser. Napkin and tampon dispensers operate independently. Selected product drops into vending opening after operator actuation. Indicator displays empty condition and blocks coin slot when vend product is depleted. Unit vend product supply is replenished on cycle determined by maintenance needs by opening door and manually reloading product into dispenser supply tracks. Empty indicator automatically resets upon refill. Track weights MUST BE USED to provide positive feed. Coins are retrieved from cash drawer opened using different key than is used to open door for service.
