COMPARE THE WEIGHT OF THE NEW FIRE-FX2 TO THE ORIGINAL FIRE-FX CABINET

1000, 1800, 1500 Series Cabinets Weigh an average of 14.75 lbs Less!

JL Industries led the industry by introducing the first pre-lined Fire-Rated Cabinets in 1991. Those cabinets have changed and simplified the installation process forever.

Now, JL has taken the next step and eliminated the heavy gypsum wallboard used to line cabinets, by replacing it with lightweight, mineral wool insulation. The second steel tub is not needed with the new design, reducing the weight even more.

FIRE-FX2™ cabinets are insulated with Firespan™ 90 by Thermafiber®, a UL-Listed, inorganic, mineral wool fiber Insulation with a high recycled content.
