

Checklist for Compliance

Restaurant owners and managers who want to ensure they are complying with the new requirements and providing the safest child seating options possible for patrons should plan to do the following:

- Work with a trusted partner to determine which chairs meet the new standard.
- Conduct an audit of your current high chair inventory to determine your need for compliant chairs.
- Ask manufacturers if they have compliant products.

Make Sure You Register!

It is important that you complete the CPSC's product registration card to improve the effectiveness and response rates for possible recalls. Product registration cards are required to ship with the product and will provide the option to register online or by mail.

To help keep your Koala products in good working order, replacement parts are available from your preferred distributor.

Designer High Chair Crotch Strap Kit 266-KIT

Are You Ready?

**New Federal
Standard for
High Chair Safety
Effective
June 19, 2019**

Focus on Safety

A new federal standard (ASTM F404-18) to improve the safety of all high chairs – both in restaurants and at home – was approved by the Consumer Product Safety Commission (CPSC) and took effect on June 19, 2019.

Eco High Chair
KB833*

This new standard impacts the foodservice industry. It is critical to know the requirements and where to find compliant chairs.

The following are part of the new safety requirements for all high chairs:

Designer High Chair
KB105

5. Product registration to be alerted to possible recalls

*made from 100% post-consumer plastic

All Koala Kare high chairs meet the **F404-18 standard**. Highlighted below are some **features and benefits** of our chairs.

Diner and KidSitter High Chairs
