

Booster Seat Maintenance Checklist

Booster Buddy KB116-03

BoosterChair KB327-02

Restaurant Booster KB854-01

Keep your Koala Kare products in good working order for the families who visit your establishment. By performing regular maintenance and purchasing replacement parts when needed, your products will safely meet your establishment's needs for many years to come. Use the checklists below to examine your booster seats and make sure they are safe and sanitary.

Maintenance Checklist

1. Make sure all surfaces are free of damage and not missing any attachable parts.
2. Check the strap to make sure it is functioning and not frayed.
3. Test the buckle to make sure it clicks when closed and is functioning properly.
4. Check that the warning label is affixed to the product in a conspicuous place and is undamaged and readable.

Cleaning Checklist

1. First, use a soft rag to wipe down all surfaces. Allow to air dry.
2. Next, apply non-abrasive disinfectant to clean, dry surfaces.
 - Do not use bleach on Koala Kare booster seats. This may cause discoloration and will void the warranty on your products.
