

Tornado Body Dryer

A Gentle, Safe In-Shower Drying Unit

The slim Tornado Body Dryer

Dry in Pleasure Instead of Pain

“Arthritis made it difficult and painful for me to towel-dry after showering.

*But now, when I use the **Tornado Body Dryer**, even the hard-to-reach areas dry without effort or pain.”*

After Shower Safety and Privacy

Finished showering? Individuals with arthritis pain, balancing issues, or limited mobility and dexterity find it a challenge to towel dry. Contorting to reach their back and legs is frustrating, painful and a safety hazard. Those who submit to assistance, suffer the loss of privacy and dignity.

Don't reach for a towel or ask for an assistant. Instead, **stay in your warm shower** and simply activate the **Tornado Body Dryer** to be wrapped in a blanket of soothing, swirling, warm air that gently and completely dries you from head to toe.

– Also great for those with ultra-sensitive skin –

Benefits

- ◆ Dry the hard-to-reach areas
- ◆ Reduce chance of falling
- ◆ No more damp/smelly towels

Reduce condensation & mildew

- ◆ **Green:** 70% less energy compared to towel usage
- ◆ Safe to use with a wheelchair

Tornado Body Dryer, LLC

Features

- ✓ Compact and lightweight (approx 9 lbs)
- ✓ Easily installed **inside** shower enclosure
- ✓ Two speed settings; simple and safe to operate
- ✓ Consistent, even airflow¹
- ✓ Powerful, energy efficient 220v / 12.5amp motor²
- ✓ Maintenance-Free / Proven Durable and Reliable

¹Patented airflow design creates a tornado-like vortex of air providing a powerful, yet gentle, breeze of warm air flowing evenly from head to toes.

²Like electric clothes dryers and ovens, a dedicated 220v line is required to produce sufficient air flow and warmth. Most all homes in North America are capable of supporting both 110v and 220v.
